

### PRODUCTION REQUIREMENTS

1. **SEED PURCHASE.** The low linolenic Pioneer varieties for this marketing agreement are purchased from your local seed sales representative of Pioneer Hi-Bred International, Inc.
2. **STORAGE / MARKETING.** Soybeans can be stored on farm or at the Designated Elevator. Storage costs at Designated Elevator are the responsibility of Grower until the soybeans are sold. Normal commodity soybean storage rates apply for that facility. Grower must reserve storage space in advance to ensure that the Designated Elevator can accommodate all Growers. If Grower elects to defer pricing beyond the date when the soybeans are delivered to the crushing plant, then Grower agrees to sign a Price Later Agreement (Credit Sale Agreement) with the Designated Elevator.
3. **DELIVERY.** Grower is responsible for all transportation costs to the Designated Elevator. Grower must coordinate delivery with Designated Elevator prior to actual delivery. Soybeans delivered to Designated Elevator after final Elevator delivery to the crushing plant will not be eligible for the grower incentive.
4. **PURITY.** Grower agrees to use best effort to maintain the purity of the identity-preserved soybeans. Mixtures will jeopardize the program. Avoid mixtures by cleaning planter boxes, trucks, augers, combines, and bins prior to handling specialty soybeans. Grower should mark locations in fields where planting of low linolenic Pioneer varieties begins and ends. Known mixtures will be purchased by the designated elevator as commodity soybeans and will not be eligible for the grower incentive.
5. **PROTECTED VARIETY.** A patent registration has been applied for on these low linolenic Pioneer varieties. Grower agrees to use the seed for planting purposes only, deliver 100% of the resulting production and not allow the seed or resulting soybeans to be used for any purpose other than implied in this agreement.
